LAW OFFICES & NOTARIES

In today's vastly competitive marketplace, more than ever before clients are demanding and expecting forward-thinking, innovative legal advice tailored to their specific business. Striving for the highest standards of professionalism and service, Salomon Lipschütz & Co. is your adviser.

Throughout our long presence in the Israeli market, Salomon Lipschutz's **Corporate and Commercial** department has been helping Fortune 500 companies, banks, public companies, industrial enterprises, partnerships, cooperatives, start-ups, entrepreneurs and investors to understand market trends, seize commercial opportunities and achieve their business objectives, no matter the economic cycle in which they find themselves.

From the very outset, we have been establishing companies, partnerships, associations and cooperatives, guiding them through investments and joint ventures, spin-offs, reorganizations and mergers and acquisitions, clearly defining and planning every step until the transaction's closing. With businesses in full swing, we help them to close all types of relevant agreements, including franchising, marketing or distribution agreements, licensing, manufacturing agreements, service provider agreements, as well as non-compete and confidentiality contracts and the sale, purchase, import and export of goods and equipment.

While partnering with a primary contact at the firm, clients benefit from our seamless collaboration with our specialists in other areas, pulling together resources from antitrust, labor law, real estate, intellectual property and banking, for example, and allowing us to provide the most comprehensive and integrated offering.
